

10" SECONDARY EXPERTEX® HYBRID

YOUNGSTOWN GLOVE SKU # 15-1499-10

Youngstown's 10" Secondary Expertex® Hybrid is a new style of protector that is built to ASTM F3258 and designed to be worn over Class 0 & 00 rubber insulating gloves. ASTM F3258 opened up the protector category to new materials so long as those materials adhere to certain criteria. The idea is to allow greater innovation through the use of modern material technology. In this case we are using Hi-Viz FR Nomex® on the top of hand, an inherently flame-resistant knit fabric that offers excellent flexibility and a lightweight feel. The .6mm Sheep Grain leather palm offers near second skin touch while still maintaining adequate abrasion resistance and grip. Coupled with a rubber insulating glove, this next generation protector achieves a new level of control for jobs that require the highest level of dexterity while maintaining electrical protection.

Hi-Viz FR Nomex®

.6mm Sheep Grain Palm

NEW INNOVATION IN SAFETY!

This next generation protector is built to ASTM F3258 and designed to be worn over Class 0 & 00 rubber insulating gloves
