

FR FLEECE GROUND GLOVE WITH KEVLAR®

YOUNGSTOWN GLOVE SKU # 12-3375-60

Youngstown's FR Fleece Ground Glove with Kevlar® is designed for lineworkers in cold, cool temperatures. The outer layer is a water-resistant goat grain leather with goat suede reinforcement for better grip in wet conditions. The interior of the glove features 60g Nomex® insulation for warmth and a soft, brushed Kevlar® lining for comfort and high cut protection. The glove is sewn into Youngstown's proven 3-dimensional and pre-curved pattern for excellent dexterity. This glove is not for extreme freezing temperatures but rather cold, cool temperatures common in most parts of the country through the fall, winter and early spring. The sleeker design allows for a winter glove that doesn't have too much bulk and maintains high levels of dexterity while still keeping users warm. Cut Level A5, Puncture Level 4, Flame Resistant and Arc Rated to 37 cal/cm².

Brushed Kevlar® Liner

Water Resistant Leather

Suede Reinforcement for Grip
