

# PowerBack™ - Light

## Add-A-Phase

## Wheeled Power Restoration Auto-Transformer

PowerBack Light is a lighter, more agile evolution of our PowerBack system, optimized for utility crews needing quick mobility without the bulk. It features a compact aluminum wheeled base with a low center of gravity for superior handling in snow, rough terrain, and confined spaces. Leveraging advanced toroidal autotransformers, it rapidly restores a missing hot leg or neutral in 120/240V or 120/208V services.

### Key Features

- **Ultra-Lightweight Mobility:** Aluminum wheeled base at just 110 lbs
- **Versatile:** Restores lost phases/neutrals for up to 200A residential services (15-20kVA)
- **Safe:** Non-metallic, flame-rated enclosures – no grounding needed
- **Efficient Design:** Low heat, quiet toroidal autotransformers

### Benefits

- Quick one-person deployment
- Reduces outage downtime during storms, accidents, or maintenance
- Superior maneuverability in snow, rough terrain, and tight spaces
- Proudly USA-made with high-quality components
- 3-year warranty for peace of mind

Attribute	Details
VA Rating	15,000 - 50,000 VA
Recommended Service	150 - 200A
Breaker	125 - 160A
Weight	91 - 110lbs
Size	29" x 22" x 13"
Connectivity	Metering Adapter - 200A Rated
Thermal Protection	105° C
Available Options	GFI
Country of Manufacture	USA
Manufacturer	Bridgeport Magnetics Group
Warranty	3 Years

Perfect for Utility Crews, Electricians,  
and Disaster Response Teams
